Note of Explanation about Zippers

1. All zippers are Black unless otherwise stated.
2. #2.5 is the smaller and #10 is the largest.
3. Continuous means that the zipper is cut from a large reel. Used where one or both ends will be sewn in or closed off.
4. "C" stands for Coil. Coil Zippers are generally smoother opening, more flexible and easier to work with.
5. "T" stands for Tooth. Tooth Zippers make a better separating zipper because the "pin in the box" is more durable, also they are more abrasion resistant.
6. "DT" or Double Tab means one slider with a pull-tab on each side making it reversible. "F" or Flipover Tab can also be used as reversible
7. "ST" or Single Tab has a tab on only the top side.
8. "R" or non locking means the slider can be moved at any time
9. "L" or Locking means the slider has a mechanism that will lock it in place.

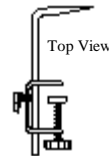

Width of a closed zipper (not including the zipper tape)

- #3 coil = .165 in ≈ 5/32 in
- #5 coil = .275 in ≈ 17/64 in #5 tooth = .225 in ≈ 7/32 in
- #8 coil = .284 in ≈ 9/32
- #10 coil = .417 in ≈ 27/64 #10 tooth = .335 in ≈ 11/32 in

Zipper

RTL WHLS/Full Reel

ZJIG Fits all #2.5 to #10.Tooth & Coil 48.40 30.01
Use for the easy, fast installing of sliders on to the zipper tape either forward or backward. Speed up production!

YKK PRE SIZED ZIPPERS

Zippers are Black unless otherwise stated

One Way Separating Zippers:

One-Way separating Zippers are like those found in most jackets. A single slider opens from the top and separates from the bottom. Sewing the top into the seams can easily shorten any zipper
